

# IMPROVE COST EFFICIENCY & PATIENT CARE IN YOUR EMERGENCY DEPARTMENT

Discover cost savings opportunities that minimize financial burdens and deliver improved quality solutions.

NES' Financial Optimization Programs identify factors that may be causing uncontrolled resource expenditure. Our experts work to improve overall operational and clinical opportunities with an innovative approach that boosts productivity, adds value and improves financial strength.

Financially controlled programs keep a finger on the pulse and help to avoid costly challenges that can lead to physician turnover and a high use of locums providers, which ultimately contribute to poor quality metrics and patient satisfaction.

NES Health's strength is our size which allows us to individualize solutions that focus on the specific needs and challenges of your hospital.

## FINANCIAL OPTIMIZATION PROGRAMS:

- Improved leadership and provider management
- Optimized billing and collections
- Effective revenue cycle and documentation management
- Cost efficient staffing models
- Innovative patient care programs

**Optimized ED/HM program**

*"Facing critical issues in a rural hospital, we required a total departmental change...financial, performance, quality, patient experience. NES' comprehensive approach and support was exceptional. The execution of their improvement plan was superior and significant improvements across the board in all areas were achieved within the first 30 days."*
